DIVIDENDS OF FIRST MONTH

Utah Mines Contribute \$439,000 to Shareholders.

GOOD PROSPECTS FOR YEAR

DALTON MANAGER RECOM-MENDS A TRAMWAY.

With the closing of the books on the Consolidated Mercur company's divi-send today and the distribution of \$25,060 by the Yankee Consolidated on Saturday, the mines of Utah will close a pretty good month. First the Quincy of Park City came forward with \$1 a share, or \$125,000. This was followed by the Silver King distributing \$100,-000 on the 10th. Next the Daly-West, with a known reserve of over \$250,060, trotted out its usual \$60,000. This was followed by the May Day paying \$4,000, or Ic a share on the 20th, while Yankee Consolidated, with a handsome sum in the treasury and its mine in the nink of gradition decided to enter the pink of condition, decided to enter the dividend list with an apportion-ment of 5c a share, or \$25,000, which will be furthcoming, as stated. The total foots up to \$439,000, and, high lead or low lead, cheap copper or high copper, every property mentioned will continue the performance without day. To be sure the low price of the red metal and the uncertainty surrounding

its immediate future has had the er-fect of temporarily curtailing produc-tion in several of the state's most promising mines, but they are all making ends meet and putting their properties in shape for an increased output when the market justifies it, and no great hardship is resulting. The United States company, with its own magnificent smelter to go into

cummission a few months later, has a world of are blocked out in its Bingham and Tintic mines—gold, silver, lead and copper—and before the year closes it will be counted as one of the very top-notch producers and dividend-payers of the state.

Before the year closes the Bingham

Before the year closes the Bingham Consolidated company will have made permanent connection with the vast ore bodies in its Dalton & Lark, Miner's Dream and other properties, its converter plant will be in commission converter plant will be in commission and its earnings will be greatly augmented. Like the United States and Utah Consolidated, it will be producing copper for practically nothing, and will like them, be able to laugh at the combines that are unable to place their copper on the market for less than 8c or 10c a pound.

These conditions bid fair to be dupli-

These conditions bid fair to be duplicated by the young mines of Beaver county, where every element of flux as found in he ores of the adjacent mines, and while they will hardly be equipped for reducing their ores to bullion during this year, a number of them will be in a position to do so next year. Gold, silver and lead will be mined in such quantities down there, also, that copper will cost them absolutely nothing to produce, so they, too, will be able to laugh at their less fortunate competitors in the world's mar-

Great strides are also being made in the different gold camps, particularly Gold mountain and Stateline, and before the year closes they will each have several contributors. The divi-

to dispose of the mine, he said he expected to do nothing of the kind.

"The best I could do," said he, "would be to practically give it away, and that I don't propose to do. I have held

Manager Young to describe the said he expected to do not held to be a said he was about of high gradient of the said he was about of high gradient of the said he was about of high gradient of

onto it a good while in the hope that it would come out all right, and I feel Star a while longer, anyhow."

Manager Packard said that the

breaking of ore for market from the the officers, and after being approved, new lead chute below the 200-foot level the following directors were named to

ing ore that was being broken and sent to the Mammoth mill, it could only be taken out slowly. However, it was being sacked as rapidly as possible, and within a few days the first carload would be sent to market.

If present conditions prevail for any length of time, and if a permanent milling arrangement is made with the Mammoth, Mr. Packard says the Star will enjoy a period of great prosperity. When the spur from the main line of rillroad is built to the mine, he says, it will be no trick at all to send 100 tons of one daily to the mill.

EDUCATING COLORADOANS.

Salt Laker in Denver Talking Up an Ozokerite Proposition,

Frank L. Moone, says the Denver Republican, is at the Albany hotel with his pockets full of ozokerite. He says he finds few persons, even in Colorado where mines and mining are matters of everyday talk, know what ozokerite is, and he has the specimens with him to enlighten them. Ozokerite differs from gisonite in that it will not burn, but otherwise the outward appearance of the material is very much the same. It bears a close resemblance the same. It bears a close resemblance to rubber, and when held over a blaze will melt. It is used in sizing calico and paper, and is employed also by oi

um in making various products.

Mr. Moone is in Denver to exploit his property, which is located in eastern Utah near the Rio Grande Western railroad. He owns a section of land there, and it is upon this tract the carderite mine is located. The the oxokerite mine is located. The mineral is found in veins about 60 feet below the surface Mr. Moone says that very little of the output of the mine has been sold as yet, but he has shipp d 2,500 pounds of it to Germany where it brought 11 cents a pound.

BROWN FOR GRAND CENTRAL. Argued in Support of Professor Jen-

ney's Theory or Mineral Deposits. (Special to The Herald.)

Nephi, Jan. 28.—Sensior Arthur Erown resumed his opening argument in the Grand Cercal-Mammoth case this morning, and continued until near the noon hour, at which time he conciuded. The senator's argument was made very deliberately, was clear cut and free from any tincture of personal abuse or detracting reference to either party, counsel or witnesses.

He began this morning on the subject of the strike of the vein, explaining the meaning of the phrase that the strike is to be measured on a level equi-distant between the walls of the The walls in this case, he said, the walls of mineralization, and, therefore, the strike would follow the The dip is at right angles to the strike.

It was shown in the workings around the Mammoth shaft to be vertical, that the whole mine is vertical, or practically so. But taking the strike as claimed by defendants, that it was equi-distant between the walls, he explained by the Mammoth maps that the strike between walls would pass and strike the outside of Mammoth lot 38 leag before it reached the southend like of the Silveropolis end line, extended across that claim.

Then he traced the channel of ore and formation of the vein, and said it was a matter of common experience that the ore deposits could not come from above, and must come from below. That it is the strike between walls would pass and strike the outside of Mammoth lot 38 leag before it reached the southend line, extended across that claim.

Then he traced the channel of ore and formation of the vein, and said it was a matter of common experience that the ore deposits could not come from above, and must come from be-

that the ore deposits could not come from above, and must come from below. That if they came from below they came up in the form of springs: they could not have been brought up by cold waters, and it was, therefore, proven, even without the aid of the testimony offered on that point, that these waters came up hot enough to melt the quartz and precious metals, which they carried in solution and deposited in this great ore channel. That the deposition of this ore shows that it must have been in the form of a river or main channel, and that that main channel, whether up or down, must be considered the strike or longitudinal course of the vein. That longitudinal course of the vein. That the easterly edge of the strike depart-ed from lot 38 before it reached the Cunningham stope, as was shown by

of the court, was not that which belonged to the country rock, but was that which was imported by these hot waters from below. That the surface cuts on Mammoth lot 38 showed none such. That the cuts showed nothing but iron, manganese and calcite, which, he argued, belonged to the country rock.

Then the argument proceeded upon the country rock.

Then the argument proceeded upon the country rock.

Then the argument proceeded upon the country rock.

The such cases of the well is now casing it off that sinking may continue."

Ore and Bullion.

Ore and bullion settlements in this city yesterday amounted to \$39,500, as follows:

McCornick & Co., silver and lead ores, \$7,100; copper bullion, \$5,200.

T. R. Jones & Co., ores, \$11,200; bullion, \$16,000.

Then the argument proceeded upon the theory that the Mammoth company had not dared to open any connection from lot 38 down to the vein itself. That from tunnel B to the Lewis raise was only twelve feet, but the Mammoth Mining company refused to open it.

fused to open it.

That it was a confession on the part of the manager, foreman, directorate and counsel for the Mammoth that and counsel for the Mammoth that they could not, dared not, open it and make the connection. It was a confession that the opening would not be in ore. He also adverted to the fact that Crismann, who made the Mammoth location, could not be presumed to know exactly the situation, and that the successors of Crismann—the Mammoth company—had ridiculed the idea that there was ore in the Grand Central claims on the west. That they had that there was ore in the Grand Central claims on the west. That they had called the claims the "Limeopolis." and asked Blanchard, Smoot and others: "How was the 'Limeopolis?" That C. E. Loose was the pioneer in tracing the line between the great ore body of the Eureka Hill, Centennial and Bullion-Beck over to the Mammoth. That, believing this, he had and Bullion-Beck over to the Mammoth. That, believing this, he had sunk a shaft and expended all his wealth and developed the claim. That success had rewarded him. That it was only when he had found the ore as was fully proven by the witnesses, and after Loose had discovered the strike of the vein, that the Mammoth company imagined or believed it was company imagined or believed it was o nthe dip of their vein. For thirty years the Mammoth Mining company years the Mammoth Mining company had worked on this property and failed to find anything, and when Loose discovered it they came forward and claimed it as a part of their dip.

BOSTON & TINTIC ORE.

Six Inches of High and Two Feet of

Gold mountain and Stateline, and before the year closes they will each have several contributors the divided in the workings of the Boston & Tintic company's property, as indicated by an interest from the workings of the Boston & Tintic company's property, as indicated by a saysy obtained yesterday. In the morth drift on the 170-foot level, where the ore has been driven into a distance of forty-seven feet, a six-inch streak on the hanging wall samples 26 per cent lead, 71.2 ounces silver and 80 cents in gold, while the remaining two feet of ore, that is counted as an excellent concentrating material, runs 3.5 per cent lead, 11.4 ounces silver and solidated was in the city again yester-day, and he spoke most enthusiastically of the outlook for that property. With regard to the story that he was about to dispose of the mine, he said he expected to do nothing of the kind. Nice Milling Ore in North Drift.

DALTON ANNUAL MEETING. Manager Young Recommends Tram-

way-New Board, Reports, Etc. the annual meeting of the Danch than ever. No, I shall stay with the Star a while longer, anyhow."

At the annual meeting of the Danch Gold Mining company yesterday afternoon, comprehensive and not at all discount of the company of the Danch Company of the Danc couraging reports were submitted by began Monday night, and he expected a carload of it would be on the surface yesterday. Its full extent had not been determined, but it gave evidence of turning out well.

The his goal well.

The his goal well arrive above the 200 carried the following the coming year: B. A. McMillan, J. H. Lakin, C. M. Garrison, A. H. Adkinson, T. B. Beatty, Charles H. Dowse and O. R. Young. While the new board did not organize, there is no of turning out well.

The big gold strike above the 200foot level, in another part of the mine,
was also holding out well, but as the
high grade rested alongside of the millpresident: C. M. Garsuson, secretary, and O. P. H. Adkinson, treasurer, and O. R.

Young, manager.

The financial exhibit showed that the cash in hand Jan. 28, 1902, was \$500.69, while receipts were as follows: From assessment No. 18, \$5,000; from delinquents, \$13.76; from ore and concentrates sold, \$942.16, and loan, \$250; a total of \$9,746.87. Expenditures for mine, mill, office, advertising and general expense accounts amounted to \$9,662.52 leaving a balance on hand, not counting the pending assessment, of \$84.35.

During the year 1,050 feet of work was done in the mine, 700 feet of which was by the parties having the lease and Little.Chief.

Surveys have recently been made for a traction tramway from the mine to the mill, a distance of 7,000 feet, and he recommends that one be put in during the coming the commends that one be put in during the coming the commends that one be put in during the commendation of the commendation

meeting that he anticipated assessments would be coming along quite regularly for a time, as it was impossi
Harry S. Joseph, Stock E

"We don't count the Dalton as expect to make a mine of it."

HAS NOT STRUCK OIL.

California-Utah Management Denies

a Story to That Effect. Manager Don C. Robbins of the Cal-fornia-Utah Oil company emphatical-y denies that a statum of oil-bearing sand has been struck at a depth of 580 feet in the well now going down near Green River station, as reported in an evening paper. He says no such statement has ever been made by any offi-

Cunningham stope, as was shown by the testimony of the superintendent of the Mammoth mine, who testified to stratified lime existing overhead in the Cunningham stope.

That the mineralization necessary to create a vein, as shown by the charge of the court, was not that which belonged to the country rock, but was

Metal Market.

Silver, 551% cents per ounce. Copper, local quotation, 10 cents; New 1,100@35c York, 11% cents. Lead, local quotation, \$3.50; New York

Sold Down to \$24.50 Yesterday-The mining share market held up fairly well yesterday, though Daly-West con-The mining share market held up fairly well yesterday, though Daly-West continued its descent with Carisa, Uncle Sam and Century trailing along behind. The cause of Daly-West's slump is still considerable of a mystery, though a belief is current that the stock being thrown on the market comes from holders who probably had burdens too heavy to bear. That so much of it is being absorbed, shows, however, that men of means who know the mine are picking up and laying it away perfectly content with the nearly 29 per cent per annum that it is earning on the present market value.

Ajax was stronger than on Monday, advancing from 34c to 35c, shading off a point at the close. Carisa, with a couple of joints of hot air broken off in two levels of the Spy ground—copper, gold and silver this time, in place of the 900 foot chutes of lead-silver opened on paper a few days since—was boosted to 47c, where it remained but a moment and then went crashing down to 43c. In the afternoon it continued to fall and was checked only after 40%c was touched. It closed on a sale at 40%c.

Consolidated Mercur sold at \$1.75 to \$1.78 in the forenoon and failed to respond at all during the afternoon call, while Lower Mammoth was released down to 75c, a share. May Day was a trifle lower, but firm, all the trading being done close around 53c.

Uncle Sam slipped back to 50%c, and closed the day 1½c above that figure, while California moved up from 46%c. Monday's closing sale price, to 43%c, from which it was eased off to 51½c at the close.

Silver Shield jumped up from 6c on Monday to 9%c, with everybody everybody.

Sluggish Intellect

CAUSED BY

"Careful inquiry in the school-room developed the fact that those children who are habitually given coffee to drink have sallow complexion, are nervous, more or less irritable, and very sluggish intel.

The week are reach home by the end of Grant Snyder's departure for New York has been delayed till tomorrow. A wire was received yesterday requesting him not to start till a letter addressed to him had been received. The greectors of the Utah & Eastern will postpone their meeting a couple of days in consequence.

Dr. M. N. Buck, the well known and the control of the distribution of the control of the are nervous, more or less irri-table, and very sluggish intel-lect, or an overwrought and abnormal imagination, results of extreme nervousness. My own experience with coffee drinking kept me afflicted for some years with severe and constant headaches, with extreme nervousness at times, "I was compelled to aban-don coffee altogether, and was quickly relieved of the head-aches and other troubles. I

aches and other troubles, I was fortunate enough to secure a package of Postum Food Coffee, but my first attempt at making it was a failure. After another trial and following directions (which are very easy by the way) are very easy, by the way), I secured a delicious drink, far superior in my mind to coffee. I have continued to use it from the start, and my improvement has been steady with no ill effects at all."

The above was written by a school-teacher, Miss E. Barnard, of Oxford.

Kan.

It is an easy matter to leave off the coffee habit, if Postum Cereal Food Coffee is used in its place, particularly when attention is given to its proper preparation. The whole secret of the preparation is in allowing the Food Coffee to boil long enough to bring out the taste and food value. night trains over that line.

New York, Jan. 28.—Commercial Advertiser's London financial cablegram: The announcement that the Boers had recently made proposals looking toward peace sent Kaffirs soaring today. These stocks had been buoyant all day, but when Balfour rade the announcement in the house of commons regarding peace overtures the shares went mad on the street after the close of the exchange and the excitement was greater even than in the boom of 1895, although business is less and is generally professional with some continental buying. The public as yet is inclined to hold aloof but probably will jump in on the advance. vill jump in on the advance.

There is no local activity in American tocks, but they responded to New York orders.

stocks, but they responded to New York orders.
Rio Tintos spurted 1% on the strength of Amalgamated Copper and on the first rally in the price of lake copper since the cut was made below 17.00. The metal here, however, reacted % to 49% the pound after yesterday's jump of 1½.

Money rates tend to be easier on continental competition.

Daily Treasury Statement. Washington. Jan. 28.—Today's statement of the treasury balances in the general fund exclusive of the \$150,000,000 gold reserve in the division of redemption shows: Available cash balance \$174,108,545; gold, \$91,002,405.

THE METAL MARKETS. Unexpected Advance in Copper the Feature of the Day.

per. This gain, it was said, was due to an effort to get the market to something like a normal basis, as the recent decline of 6 cents from the top price of 17, which was quoted the middle of December, was said to be quite unwarranted by the commercial conditions. Today's prices were 11½ for lake, 11½ for cectorlytic and 11½ for lake, 11½ for cectorlytic and 11½ for celetrolytic and 11½ for celetrolytic and 12½ for ce

CATARRH OF

THE STOMACH

Effectual Cure For It.

Catarrh of the stomach has long been

sometimes with sour or watery risings,

a formation of gases, causing pressure on the heart and lungs and difficult breathing, headaches, fickle appetite,

nervousness and a general played-out languid feeling.

There is often a foul taste in the

GRAIN AND PROVISIONS.

New York, Jan. 28—A successful turn was made against the shorts in today's stock market. How far the day's demand for stocks represented new buying from the conditions west can only be conjectured. Conditions west can only be conjectured for selling vesterday remained unaltered today, without affecting the strong tendency toward recovery. The weakness in the gradin markets, which yesterday was made the basis of runers of financial today as showing and conditions for the twinter wheat crop.

The formation by the United Mine Workers of flat demands for higher wases, which depressed the coalers yesterday, was ignored and these stocks were quite conspicuous for activity and strength. It is thought that part of the recent selling of the coalers has been in anticipation of this showing shape the professional character of the trading.

The most important influence in the advance was the stimulating effect of the trading.

The most important influence in the advance was the stimulating effect of the trading.

The most important influence in the advance was the stimulating effect of the trading.

The most important influence in the advance in raw copper and the heavy buying in London were taken to indicate a sentiment in favor of an advance by the Standard Oil party, while stock were almost twice as great as those in any other one stock. Boston, Jan. 28.—There has been a fair demand for wool here during the past week and full prices have been paid. Territory wools continue to head the list of sales. They are in good demand and the supply is not plentiful. The scoured basis is 47649 with choice loss of staple in at 50, while staple liner, fine medium and fine will range up to 43652. Medium territory are quoted firmer at 38640 with choice lines.

There is a better demand for Australian wool and some fair lots have been cleaned up to manufacturers. Offerings on the market are small and the wools sold were generally at prices below the cost to replace them from abroad.

Australian merinos are costing 76720 for super combing with good at 6568.

San Francisco, Jan. 28.—Wool—Nevada. 10@12: eastern Oregon, 10@13; valley Oregon, 13@15; Humboldt and Mendocino, 10@12%; mountain, 8@9; South Plains and San Joaquin, 6@8; lambs, 8@8.
